Capabilities Statement

Forseti's primary focus is servicing victims of domestic violence. Through its cohesive database, all stakeholders with a need-to-know can access domestic violence risk assessments or incident reports in real time. This allows for a smooth handoff from the criminal to the social justice system, where social services can provide safety planning and case management. Forseti has digitized how information is gathered, shared, and reviewed.

Forseti's Honest Assessment Response Tool Domestic Violence assessment platform is a multi-stakeholder enterprise system designed to streamline the gathering of information, confidential sharing of that information, and subsequent analysis. Forseti's Referral and Alert System instantly notifies agencies with a need to know that a victim/survivor, or suspect/offender, requires immediate attention or assistance from multiple internal or external agencies. Forseti is data and prevention-driven.

To provide first responders with data-driven, digital solutions to connect at-risk individuals to life-saving services in real-time.
